

## PACK MULE VS MOTREC

Motrec E-262 (36v) VS Pack Mule SC-775 (36v)

FEATURE	PACK MULE	MOTREC	WHY IT MATTERS
<b>Cargo Capacity</b>	1,200 lbs	1,000 lbs.	Pack Mule's 20% greater cargo capacity means that more can be carried every trip, reducing the number of trips and increasing productivity.
<b>Deck Space</b>	48" x 31.5" standard with six optional sizes	60" x 30"	The 48" x 31.5" deck is standard, but if you really need more space, Pack Mule has six larger options.
<b>Turn Radius</b>	55"	60"	Pack Mule provides the tightest turn radius in the industry, making it possible to move easily in tight places.
<b>Battery</b>	245 amp per hour	232 amp per hour. Upgrade available	Pack Mule's standard battery provides more amp/hours. And if you need still more there are options available.
<b>Instrumentation</b>	Smart View Display with battery status, hour meter and fault codes	Battery status indicator only. Upgrade available	Full instrumentation not only allows your equipment to be more productive, but it enables more efficient charging and better preventive maintenance.
<b>Cargo Deck Material</b>	Melomine Laminated Decking	Painted Plywood Decking	Melomine lamination provides longer life and prevents early failure due to warping or splitting.

<b>Programmable high-frequency charger</b>	Standard	Not Available	Pack Mule's programmable high-frequency charger uses temperature compensation and automatic cell equalization to optimize runtime and extend battery life.
<b>Operator Friendly Ergonomic Matting</b>	Standard	Available as an upgrade	Ergonomic matting increases operator comfort and reduces operator fatigue allowing for safer vehicle operation.
<b>Adjustable Backrest</b>	Standard	Available as an option	Pack Mule's adjustable backrest improves operator comfort, decreasing operator fatigue and increasing safety and productivity.
<b>Steps on Back Rest</b>	Standard	Upgrade available.	Steps make it easy to get to hard-to-reach places, increasing productivity and reducing driver fatigue.
<b>Warranty</b>	Three-year Warranty	One-year Warranty	Pack Mule provides the industry leading (and only) three-year warranty. Motrec does not offer an upgraded warranty, but another manufacturer offers one for \$683. However, that one has a low hours limitation.
<b>Free Trial</b>	Pack Mule will configure the vehicle to your specs and get it to you.	Might provide a demo of a standard vehicle through a dealer	The best place to compare vehicles is in your own work environment. We make that easy by providing the vehicle, configured to your specifications, and letting you use it for a week. If the other manufacturer will do the same, you can compare them side by side.
<b>Delivery Time/Configured to Order</b>	As little as 48 hours. Up to 3 weeks on larger orders.	Standard products are often available at the dealer's, but special configurations are another matter.	Responsiveness is a basic part of our customer service. We can get you <i>your</i> vehicle quickly. The same is true for parts.
