

PACK MULE VS MOTREC

Motrec MS-260 (36v) HD VS Pack Mule SCT-7750 NXG (36v)

FEATURE	PACK MULE	MOTREC	WHY IT MATTERS
Load Capacity	Cargo Deck: 1,200 lbs. Tow: 5,000 lbs	Cargo Deck: 1,300 lbs. Tow: 6,000 lbs.	Similar load capacities don't really tell the story. Pack Mule's substantially longer run time between charges means that you get more work done every day.
Deck Space	48" x 31.5" standard with six optional sizes and several available shelf options.	59" x 30"	Pack Mule provides the deck you need. The 48" x 31.5" is standard, but if you really need decks with more space, Pack Mule provides them.
Turn Radius	55"	60"	Pack Mule provides the tightest turn radius in the industry, making it possible to move easily in tight places.
Motor	13.2 HP sealed AC motor	10 HP shunt motor	Pack Mule's standard AC motor not only provides greater efficiency, but since it's sealed and has no brushes to inspect or replace, it's maintenance free.
Battery	245 amp per hour	232 amp per hour with upgrades available	Pack Mule's higher amp/hours combined with the more efficient AC power system provides greater run time as well as longer battery life.

Instrumentation	Smart View display with battery status, hour meter and fault code display standard.	Battery Status Indicator only. Upgrade available.	Full instrumentation not only allows your equipment to be more productive, but it enables more efficient charging and better preventive maintenance.
Programmable high-frequency charger	Standard	High-frequency charger. Not programmable	Pack Mule's programmable high-frequency charger optimizes run time and extends battery life using temperature compensation and automatic cell equalization.
Cargo Deck Material	Melomine Laminated Decking	Painted Plywood Decking	Melomine lamination provides longer life and prevents early failure due to warping or splitting.
Operator Friendly Ergonomic Matting	Standard	Available as an Upgrade	Ergonomic matting increases operator comfort and reduces operator fatigue allowing for safer vehicle operation.
Adjustable Backrest	Standard	Available as an upgrade.	Pack Mule's adjustable backrest means that the operator can adjust the backrest to the most comfortable position. This increases operator comfort, productivity, and safety.
Warranty	Three-year Warranty	One-year Warranty	Pack Mule provides the industry leading (and only) three-year warranty. Motrec does not offer an upgraded warranty, but another manufacturer offers one for \$683. However, that one has a low hours limitation.
Free Trial	Pack Mule will configure the vehicle to your specs and get it to you.	Might provide a demo of a standard vehicle through a dealer	The best place to compare vehicles is in your own work environment. We make that easy by providing the vehicle, configured to your specifications, and letting you use it for a week. If our competitor will do the same, you can compare them side by side.

**Delivery
Time/Configured
to Order**

As little
as 48
hours. Up
to 3
weeks on
larger
orders.

Standard
products are
often
available at
the dealer's,
but special
configurations
are another
matter.

Responsiveness is a basic part of our
customer service. We can get you *your*
vehicle quickly. The same is true for parts.
